P950-9000 & P950-9100 OneVisit™ Converter

The AQUABASE® Plus platform has been at the forefront of waterborne refinish systems for collision for more than two decades. NEXA AUTOCOLOR® is committed to the innovation of new products and repair processes to improve bodyshop quality and profitability.

UNLEASH UNLIMITED EFFICIENCY.

OneVisit Converter allows to continue enjoying the advantages of Aquabase Plus basecoats, targeting to improve the bodyshop effectiveness and at the same time providing the flexibility of choosing the preferred way of application: Single coat application or Wet on Wet application.

The platform we offer is unparalleled in its versatility, standing out as the most adaptable option available. Customers benefit immensely from its unique combination of features. It not only ensures the market leading color accuracy and visual appeal from Aquabase Plus but also boasts a system that prioritizes simplicity. Its user-friendly application is tailored to meet the needs of all users, regardless experience level.

Our OneVisit Converter perfectly embodies this blend of excellence and adaptability. We are keen on addressing specific needs, particularly where flexibility is a deciding factor. Underlining our commitment to customer-centric solutions.

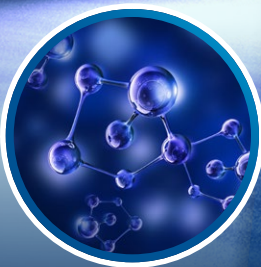

FEATURES	BENEFITS
Flexible application	Customer can chose based on their requirements. Either Wet on Wet or single visit
Easy adoption	One system for 2 applications; Standard and One visit, without additional inventory
Compatible with digital ecosystem	Best in class digital tools with PPG LINQ™, PPG VISUALIZID™, PPG DIGIMATCH™ and MOONWALK®
One visit application – no flash off	Reduced labor time and completion of multiple jobs in the booth

- Gives additional flexibility
- Delivers consistent results in premium quality
- Meets all current and future colour trends
- Optimises profitability enabling the painter to do multiple jobs in one booth cycle.
