

SAME SYSTEM. SAME GREAT RESULTS. **MORE FLEXIBILITY.**

PPG ENVIROBASE® HIGH PERFORMANCE **OneVisit™ Modifier**

OneVisit Modifier enables wet-on-wet, single-visit application while retaining the easy mixing, blending and spraying properties of the *Envirobase* High Performance waterborne system. With our new *OneVisit* modifier, painters now benefit from greater flexibility in how they choose to achieve a first-class finish.

SAME SYSTEM. SAME GREAT RESULTS. MORE FLEXIBILITY.

Introducing *OneVisit* Modifier, opening up new possibilities for the Envirobase High Performance waterborne system.

The *Envirobase* High Performance range is recognized around the globe for its market-leading colour, performance and finish. With *OneVisit* Modifier joining the system, painters can now benefit from greater flexibility in how they choose to achieve a first-class finish.

OneVisit is an innovative modifier that can be added to *Envirobase* basecoats to enable wet-on-wet application. The paint is just as easy to mix and spray as with standard application and provides the superb appearance, vibrant color and quality that *Envirobase* High Performance is renowned for.

The wet-on-wet method supports complete basecoat application in just one visit to the paint booth. This means the painter's time is streamlined for maximum efficiency.

A new way to achieve outstanding results from PPG and *Envirobase* High Performance

OneVisit Modifier is entirely optional and there is no change to the existing *Envirobase* High Performance product lineup. With rapidly changing demands and priorities, *OneVisit* gives you the flexibility to organize your body shop in a way that suits you.

OneVisit. Many benefits.

- **Increased flexibility** – choose between standard or wet-on-wet application
- **User-friendly** – easy to mix, spray and blend
- **Robust application** – even in extreme climatic conditions
- **Performance** – proven excellent color match
- **Efficiency** – ensure painter's time is utilized for maximum efficiency
- **Compatibility** – easily adopted into the *Envirobase* High Performance platform and works seamlessly with PPG LINQ™ digital tools and the PPG MOONWALK® automated mixing system
